

SLATTED SCREEN FENCING

Modular Fence Panel Installation Guide

UNPACK YOUR DELIVERY

Your panels will arrive on a pallet, this will be delivered by an independent delivery company who will unload the pallet from the truck.

Unwrap your delivery and separate the modular pieces, which will be labelled, for example panel 1 bottom, panel 1 top, the tops are easily identified as they have a capping strip attached.

INSTALLATION

1. Starting with your bottom modular section, position this against the front of your posts.
2. Use a spirit level to ensure this panel is level.
3. Pre drill a pilot hole using a small diameter drill bit into the vertical support on the rear of the panel. Do this between the slats to give a discreet fitment.

INSTALLATION CONT'D

4. Use stainless steel screws to fix the panel to your post. We recommend 3-4 screws* at each side, spaced evenly. *Our small head screws are perfect for this job.

5. Position your next panel on top of the bottom one that you have just fixed into place, don't worry about spacing as the vertical batten on the rear protrudes slightly to give consistent spacing.

6. Repeat steps 3 & 4 and continue until your desired fence height is reached. Our top modular panel pieces have a capping strip fitted, this makes them very easy to identify the tops from bottoms.

7. With your first section in place position the next modular piece next to this section and repeat the above process.

8. Continue the installation until you have completed the run of fencing.

9. Stand back and admire your stunning slatted fencing, installed easily and quickly.

PROTECTING YOUR PANELS

To help prevent your panels from weathering and going silver grey, we recommend treating your panels with a Clear UV Protection Oil.

If your preferred look however is the silver grey, then simply leave your panels to do their thing, the sun will do the rest.

SEND US A PICTURE

Don't forget we would love to see your project, please do send us some pictures and we'll show them on our social platforms to inspire others.
